## **UNILIS AGTECH: CALL FOR APPLICATIONS** **NEXT SELECTION JURY APRIL 16TH, 2021**

Launched in January 2020 by Arvalis and Unigrains to provide technical and financial support to young, innovative companies, Unilis Agtech will hold its 3rd Selection Jury on April 16th, 2021.

The companies sought are developing solutions for row crops (straw cereals, corn, potatoes, flax) or forage crops production systems : nutrition and plant protection, machinery and agro-equipment, digital agriculture, etc. These solutions can be applicable at any level - field, farm or regional - and can cover broad areas of agricultural activity: production, storage, traceability, etc.

**Candidates have until Friday, March 26th, 2021, to submit their applications for the 3rd jury.**

In function of the context, candidates will be invited to present their projects remotely and the necessary measures will be implemented to ensure the analysis is carried out under the best conditions. A pre-selection will be held early April 2021, in order to present the most mature and relevant candidatures for collaboration to the Jury.

Since its launch, Unilis has received nearly 30 qualified candidatures and, in Summer 2020, finalized its investment in Inarix. Discussions are underway in view to support new companies early 2021.

The Unilis Agtech team is available to accompany entrepreneurs in the application process.

Looking forward to partnering with you to grow new solutions for the agriculture of tomorrow.

**The Unilis Agtech Team**

**Jean-Marc Bournigal, President of the Unilis Agtech Jury**

The companies sought by Unilis Agtech are developing solutions applicable to French farming systems, whether they are based in France or abroad, and have completed proof of concept. They have formed teams to carry out their ambitions in innovative fields such as digital agriculture, agro-equipment, plant nutrition and protection, or any other relevant solution for the sustainable improvement of systems be it at field, farm or regional scale.

## WHY APPLY / JOIN US ?

The technical support of Arvalis

Financial support adapted to your strategy

A network of seasoned mentors, partners of Unigrains and Arvalis
